

Saving the Environment One Wash at a Time.

WaterSavers®
Using Less. Returning Clean.

WaterSavers® is all about doing our part to protect the environment.

Since you chose this wash, you're doing your part, too!

Pavement Pollutes!

Did you know that when you wash your car at home, the run off carries the grime and chemicals into the soil and storm drains that empty into our rivers?

At our wash, we make sure we always filter our water before it goes out into the environment!

Recycle & Reuse!

A large percentage of our water is filtered and reused in subsequent washes. This means we use less water overall, and since it's cleaned before it touches your car, you still get the same great clean!

Positive Impact

By reducing water pollution in our communities and by using less water per wash, we are protecting our streams, rivers and water tables.

By supporting this WaterSavers® wash, you're doing your part for a cleaner, healthier world!

Quality Clean

Through our innovative techniques, we use an average of no more than 40 gallons (151.5 liters) of fresh water per car. That's less than most washing machines!

Yet you still get the same quality clean that you've come to expect — it's innovation you can use!
